MC018-130 High Current PLUS+1[®] Controllers

Mobile machine management

Danfoss PLUS+1[®] controllers are elements of the flexible, powerful, expandable, and affordable family of mobile machine management products. These devices are general-purpose controllers that are equally suited for use as a member of a distributed machine control system, with intelligence in every node, or as a stand-alone controller.

Product highlights

The PLUS+1[®] High Current controller employs a 32 bit Cortex-M3 Processor, providing the controller with extremely fast single cycle processing speed and 512K internal flash. It features high current capabilities for your machine control.

Application development

Users develop MC018-130 applications with PLUS+1[®] GUIDE. This Microsoft Windows based development environment features a user-friendly, field proven, icon-based graphical programming tool, application downloader, and service/diagnostic tool.

C3, C4

Pin	Controller function	Description
C3-P1	Battery power	120A battery connection (externally fused)
C4-P1	Battery ground	120A battery connection

Device must be mounted on a flat metal surface that is less than 70° C (158° F) for full output capability.

If the metal surface is greater than 70° C (158° F), built in thermal protection will limit the maximum output current allowed for all PWM's.

Use care when wiring mating connector. Pinouts are for device pins.
