

Miniature Metric Ball Bushing™ Bearings

Smooth Operation, Light Weight and Long Lasting

Thomson Miniature Metric Ball Bushing™ offer smooth and rapid operation in a light and small package that last up to 27 times longer than conventional linear bearings!

Light weight design

Low inertia enables precision movements and short acceleration times.

Double lip integral wipers

Keeps dirt out, lubrication in and increases life expectancy.

Friction coefficient as low as 0.0001

Eliminates stick-slip and ensure smooth operation.

Four different sizes

Select the optimum size for your application parameters.

Super finished bearing plates

Provides smooth operation and long life.

Travel speeds up to 3 m/s

Enables short cycle times and rapid adjustments.

Optional corrosion resistant version

For use in harsh environments.

Local support around the globe

Thomson is a reliable partner with customer support centers all over the world ready to service you!

Contact Thomson today to learn how we can help you make your ball bushing bearing project successful!

Engineering Data

Thomson Miniature Ball Bushing™ bearings are precision components. To preserve bearing warranty you must use Thomson 60 Case LinearRacé shafting. Please contact customer support for additional technical support.

Specifications and Dimensions

Part number ⁽¹⁾			Dimensions [mm]					Number of ball tracks	Mass [kg]	Dynamic load rating ⁽³⁾ [N]	Load limit ⁽⁴⁾ [N]	Diametrical clearance ⁽⁵⁾		
No integral wiper	One integral wiper	Two integral wipers	d ⁽²⁾	D	C (h14)	C1 (h13)	C2 (m.n.)					House bore (H7) [µm]	House bore (H6) [µm]	House bore (H7) [µm]
MM03	N/A	N/A	3	7	10	-	-	4	0.001	45	50	+25 +6	+20 +5	
MM05	MM05W	MM05WW	5	12	22	14.2	1.10	4	0.010	170	190	+29 +3	+23 +2	
MM08	MM08W	MM08WW	8	16	25	16.2	1.10	4	0.020	310	340	+29 +3	+23 +2	
MM12	MM12W	MM12WW	12	22	32	22.6	1.30	5	0.040	650	715	+33 +4	+26 +3	

- (1) For corrosion resistant bearings, add the suffix "-CR" to the part number. Also reduce the above load ratings by 30%.
- (2) Nominal LinearRacé diameter.
- (3) For a rated travel life of 100 km.
- (4) The load limit is the maximum load that may be applied to a bearing/shaft. It is important to analyze the application so that peak or/and shock loads do not exceed the load limit.
- (5) For ball bushing bearings mounted in a housing and using LinearRacé shafts.
